

EAD @ 10  
THOUGHTS ON THE FUTURE

Jeanne Kramer-Smyth

# Beyond the Markup

- Tools
- Centralized Repositories and Union Catalogs
- Data
- User Generated Content
- Visualization

# More Tools

- Tools for creating EAD
- Tools for conversion between formats
- Tools for visualizing EAD

# Possible Impacts of Tools

- Small archives can join the fun
- Reasons to use EAD beyond 'getting the finding aid online'
- Faster and easier to gain high level understanding of records available
- Better tools for administrators
- And eventually... improved paths for the general public to follow to primary sources

# More Centralized Repositories

## Examples:

- Online Archive of California (OAC)
- Northwest Digital Archives (NWDA)
- ArchiveGrid

## Related efforts:

- Descriptive Metadata Guidelines
- Further work on centralized thesaurii

# Metadata Guidelines

## CDL Guidelines for Digital Objects: Descriptive Metadata Guidelines

- The form of the heading should be taken from a standard or local thesaurus
- If possible, indicate the code for a standard naming authority file from which the heading is taken. Use "lcs" for LCSH, "aat" for AAT, or "gmgpc" for TGM I

# Centralized Vocabulary Work

- OCLC Terminologies Service
- High Level Thesaurus (HILT) project (targeted completion of phase 4 in early 2009)
- Simple Knowledge Organisation Systems (SKOS) leverages the Resource Description Framework (RDF) to support representation of knowledge organization systems (KOS) such as thesauri, classification schemes, subject heading systems and taxonomies.

# Encoding controlled vocabularies for the Semantic Web using SKOS Core

Linda Cantara:

“Controlled vocabularies facilitate consistent documentation, but they do not guarantee flawless searching across multiple domains.”  
we need for tools that can “link the relationships between search terms or phrases, tools that will facilitate searching for abstract and semantically significant content.”

# Controlled Vocabularies & Subjects

- More transparency about vocabularies being used
- Work on formal cross walks between vocabularies
- Innovation into computer driven term grouping

What about user contributed tags?

What could the  
relationship be  
between EAD subjects  
and folksonomic tags?

# Cross Collection Understanding

INSTEAD OF

a text list of groups of records

RATHER

An understanding of quantity, subject and years covered by the combination of many collections

# Information Visualization

- EAD opens the door to structured data about archival records
- Structured data lets us aggregate data – 30,000 foot perspective
- Standard used around the world
- XML is open and accessible

# Challenges to Aggregation

- Diversity of subject terms
- Incomplete subject assignments – sometimes subject implied by title is not included as a subject
- Differences in standards for specifying dates and collection sizes

# Future...

- Centralized Repositories and Union Catalogs
- Metadata Guidelines
- Thesaurii and subject cross walks
- Establish best practices for incorporating user generated tags in predictable and regular manner
- Information Visualization to give us the 30,000 foot view of collections

ArchivesZ

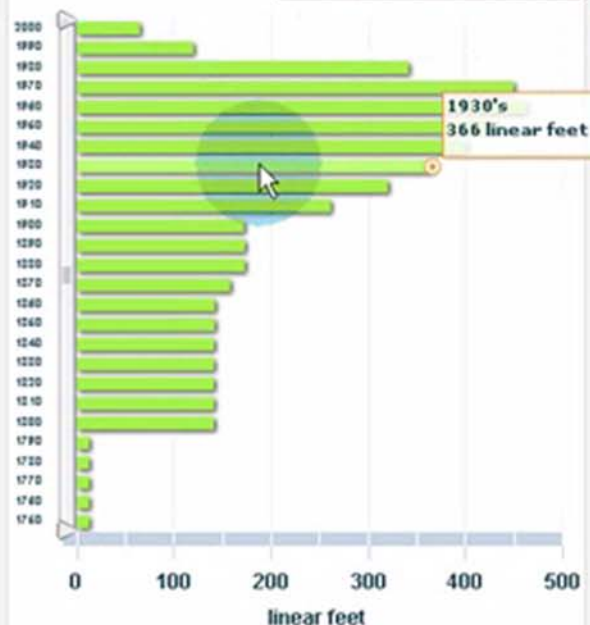

# ArchivesZ

- Information Visualization class project
- Focus on EAD as a source of structured data
- Pull data into database for scrubbing
- Build UI based on aggregation and visualization

## Decades

Selected:1750-2000

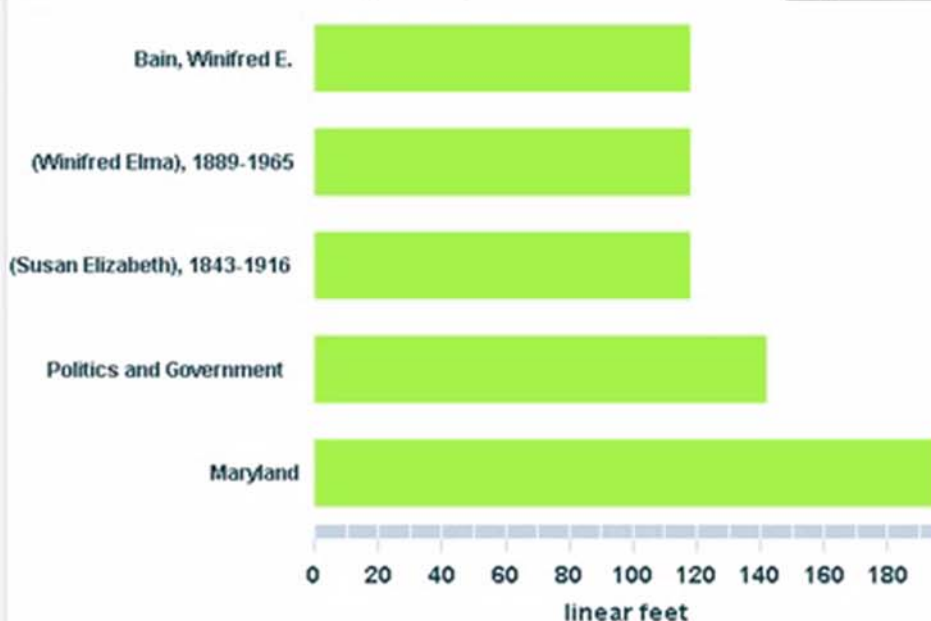

Zoom In to Years

## Subjects

Including all subjects

Top 5

## 31 Collections Found

Title	Date	Size	Repository Nar	Access#
Papers of the Brooke Far	1750-1980	13	UMD Historical	80-3
Archives of the American	1935-2006	46	UMD Historical	86-138
Papers of Clara Barton	1887-1918	0.25	UMD Historical	90-372
Papers of Theodore Biss	1910-1982	0.5	UMD Historical	62-2
Papers of William L. Arno	1884-1936	14	UMD Historical	72-2
Papers of Charles Wallac	1915-1972	13.5	UMD Historical	86-127

## Abstract of Selected Collection

The Brooke Family was a large family of landowners in Maryland whose records relate to farm activities and family life on the plantation "Falling Green." The Brooke and Farquhar families were active members of the Quaker community in Sandy Spring, Montgomery County, Maryland. The collection contains the
