# Greene and Meissner's Solution: MPLP

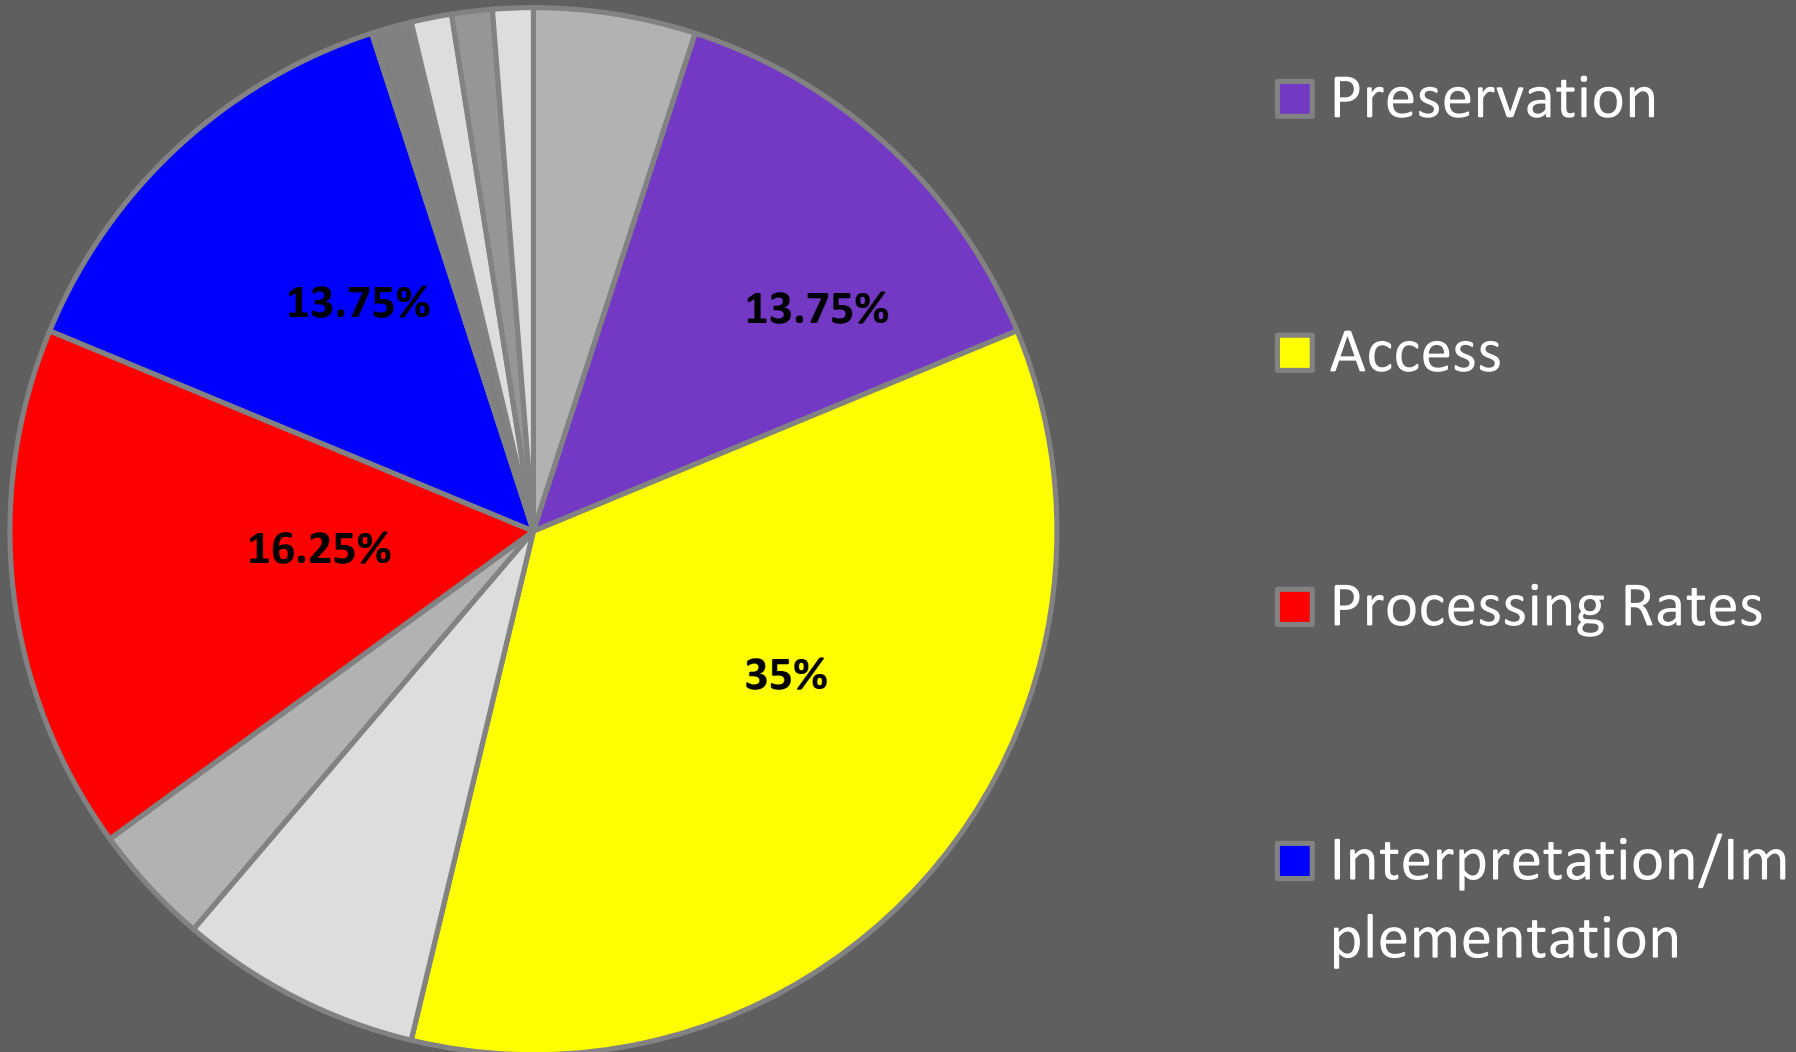

# Research Questions

1. What methods could be employed to measure the impact that MPLP is having on archival institutions? What aspects of impact should be investigated?
1. What factors have made it difficult to assess the impact of MPLP?

# Evaluation Needs Assessment

Percent of First and Second Choice Evaluation Priorities

# Evaluation Questions

1. Does MPLP increase access to archival materials?

1. Does MPLP decrease arrangement and description time?

# Reference Survey

Designed to measure:

1. How easily a patron can find the information
1. Whether they are satisfied with the services

# Processing Rates and Usage Statistics Slip

Designed to Track:

1. Processing Rates
2. Correlation between format and speed
3. Imposed Arrangement, Description, and Preservation Measures
4. Use

# Retrospective Processing Rates Study

## Conditions:

1. One person per collection
1. Retrievable hours

# Target Reference

A photograph of a filing cabinet drawer filled with numerous yellow and white file folders, each with a handwritten label. The text "Target Reference" is overlaid in large, bold, black font in the center of the image. The labels on the folders are mostly illegible due to the angle and focus, but some words like "MINTS" and "MINTS" are visible on the left side. The folders are arranged in a dense, vertical stack, and the lighting is somewhat dim, creating a sense of a busy, organized workspace.
